It does not take into account your objectives, financial situation or needs. Before acting on any information, you should consider the appropriateness of the information provided and the nature of the relevant financial product having regard to your objectives, financial situation and needs. The Trading Coach is an Investing Business Education and Coaching Organisation and does not currently hold an AFS License. As such does not and will not provide specific information, general advice nor specific advice.. We always recommend individuals seek financial advice from a qualified and accredited financial advisor before participating in this, or any other, education and coaching program.

Asking the **question**

How do they do it... the people that use their laptop and the internet to make money from anywhere in the world, trading the markets online?

They don't necessarily start with a lot of money, but they seem to make consistently good choices with their trades and investments: leveraging the profits they make today into bigger profits – seemingly with ease.

What strategies do they use to make money trading forex? Earning more than \$2K a week in just a few hours work in their spare time.

It's not rocket science; they don't use automated systems that just don't work... They make **conscious rational** decisions about where to put their money, make a profit and move on to the next investment.

With the shift in the global economy in recent years, working from home is fast becoming a viable option for many people.

How do YOU take advantage of this opportunity to build your Lifestyle Income?

KEY #2

A Focused Trading Education

Imagine that you're like the 90%+ of private traders who choose to trade using Technical Analysis... It is evident that you will need assistance to understand how to read the charts and what those squiggly lines on a screen actually mean.

There are many thick books on all aspects of trading technical analysis – covering all aspects of different indicators & trading techniques and it can be very easy to get stuck in the familiar “Paralysis of Over Analysis” – thinking that you need to know everything about all of the indicators before you actually start to trade.

Any Good Trader will tell you that you only really need to learn the Key Indicators that are used to produce consistent positive trades, and then learn how to apply them consistently as you begin to trade.

To be a Profitable Trader, **You definitely need a solid education in the reading of trading charts.**

But; like any other technical skill, once you learn that, it is already learned and generally you don't need to learn technically any more than that...

You need then to actively practice the use of the indicators and your experience will allow you to better understand WHY the indicators work and WHAT they are telling you about the competing Bullish and Bearish Pressure within the Market.

As successful traders, coaches and educators, The Trading Coach has researched, reviewed, analysed and tested hundreds of trading indicators and strategies and have assembled the strongest into a very robust, High Probability Trading Method (The LIFT Trading Method) that is strong in its simplicity and ease to follow.

That's the Starting Point of a Solid Education...

Having an understanding of how to read a chart and find strong Trade Entries and Exits is an **important aspect** of any Trader's Education.

Equally as important for becoming a Balanced, Successful and Profitable Trader are the essential "non-technical" aspects of Trading Profitably, including:

Risk Management

How to Minimise Your Loss and Increase Your Profitability

Trading Plan

Using a Trading Plan to Help You Create Consistent Sustainable Profit

Analysis

Review past Trades to Improve Your Results & Maximise Trade Return

Trading Targets and Goals

Setting and Achieving Trading Targets and Trading Business Goals

Mindset

How to **BE** a Successful Trader, Maintain your Focus and Grow

There is a vast difference between Hobby Traders & Profitable ones - the difference is that a Profitable Trader is Committed to Building Success, one Trade at a Time, Focusing Energy & Effort.

The distinction is that Profitable Traders **PLAN** for Success, use all of the tools they need to produce **Consistent Profit** and Seek Guided Coaching and Support to make sure that they stay on track.

CRAIG

Case Study

Craig owned a successful architecture business on The Sunshine Coast. In his 50's, Craig had already been trading for more than 15 years, but wasn't getting the results he wanted.

He struggled to earn more than 10% return per month, often throwing away hard earned profits in a few mistimed or low probability trades. He wanted to live a simpler, relaxed and comfortable life, where he didn't have the headaches or time drain that came with his business.

Craig had learned lots of techniques and strategies from so-called gurus, most of them "kind of worked" sometimes but he didn't have a plan on how to build a Consistent and Growing Income from Trading. He didn't have a strategy to Manage Risk or keep the X Mindset Challenges from stealing his profits.

Regular Coaching helped him apply active and passive Risk Management and Mindset Techniques to not only lock in more profits on stronger trades, but also avoid losing money on risky, unplanned or undisciplined gambles.

In less than 8 months after starting in LIFT, Craig was able to step away from his architecture business and become a full-time trader, earning more than 80% profit consistently per month on a \$20,000 plus trading account.

Now Craig spends his days working on personal projects, increasing his passive investment portfolio and enjoying long fishing and camping trips with his friends and family.

An advocate of building a strong financial future, Craig has referred several family members & friends into LIFT, helping them secure their Finances and Build their Lifestyle Income From Trading.
