Trading Profitably Doesn't Have to Be Difficult

Tired of The Rat Race and Want a Brighter Financial Future?

You've heard of people who are making a Lifestyle Income from Investing & Trading and you really want to leave the daily grind of home to work and work to home, trying to *squeeze* in a lifestyle, behind...

Imagine providing a Brighter Financial Future for your family... where your hard work has paid off and Money Works for You.

A future where your children or grandchildren have the best education and opportunity for life and where you can enjoy life free from financial worry.

The Truth is that there are traders who turn this desire into a **profitable, sustainable home business** in their spare time – **in as little as 8 to 10 hours per week in 12 to 24+ months.**

This takes effort, focus and investment. And for some people it may take longer, depending on their circumstances.

This Strategy Guide will help you understand the opportunity of forex trading and how someone can Build a Lifestyle Income.

The Changing Face of Retirement in the 21st Century...

If you have the focus and are prepared to put in the work, you too can live the **F**inancial **I**ndependence **R**etire **E**arly Lifestyle.

With the Global Pandemic and growing economic uncertainty changing the way people earn in the 21st Century, more people have come to see that life is more than just building a career and planning for a far-distant future retirement.

We have learned that life is about *building a lifestyle and enjoying every moment of life.*

More people in their 30's & 40's are seeing what we've been saying for a long time: that retirement is linked to *financial stability*, not necessarily to age; if you build a secure financial foundation, retirement can come sooner than you expected.

People who are closer to what would be considered retirement age are now looking for opportunities to fast-track their retirement plans and enjoy life while they have the good health to do so.

If this sounds like you and you want to see how investing spare time over the next 18 to 24+ months to build a sustainable, growing investing and trading income, then LIFT **may** be an opportunity to make progress towards this goal...

HOW Forex Trading Works

Factors such as Employment, Manufacturing Interest Rates & Import / Export Ratio Affect the Strength of a Currency

Technical Analysis

Traders Buy and Sell Currency Contracts With Each Other

The Values of Currencies Fluctuate every second based on Market Supply and Demand.

Traders Trade Contracts on One Currency Against the Value of another in a “**Currency Pair.**”

Traders then Buy and Sell Contracts Depending on Whether they think that value will Rise or Fall.

e.g. GBPUSD is 1 British Pound = ? US Dollars

Say, for example, the GBPUSD is \$1.3865

This means if you Buy the GBPUSD at \$1.3865 and you Sell at \$1.3875, you've made a 10 pip profit.

Exchanging

On a Small Scale, you may have traded already when you travelled overseas and waited until the AUD moved up to get more local currency to spend.

Trading

On an Investing Scale, with Leverage, Traders make these trades with larger sums of money on a regular basis to make a profit on these regular price fluctuations.

The **FACTS** About Forex Trading Failure & Success

Approximately **300,000** Australians Trade (only 1.2% of the Population)

*Only around **50,000** Australians Trade Forex (0.2% of Pop.)*

Only **2 to 3%** of **All Traders** Worldwide are Profitable.. *In Forex it can be as high as 15%.*

Unlike most of the world, 100:1+ Leveraged Trading in Australia is Restricted to “Pro Traders”. There are trading volumes, a knowledge test & an income/asset tests to qualify for Pro Trader. A “Lifestyle Income” for most Australian-based Traders requires access to Pro Trader leverage. **It takes time, energy, focus, a plan and support to achieve this level. Only 2% of Traders will.**

Why Do So Few Retail Traders Reach Pro Trader Status?

The **3 KEY REASONS** Why Most Traders Fail:

- No Clear, Reality-Based Focus or Plan
- A Knowledge Gap: MINDSET, TECHNICAL & BUSINESS
- No Accountability or Support Structures

Beware of Scams and Schemes

The Truth is that nobody, more than you, is invested in your success.

It can be tempting to have someone build your retirement dream for you and it sounds less risky to give your money to someone else with more experience to make you rich. But the truth is that this is exactly how most scammers convince hopeful people to hand over their hard-earned savings, never to be seen again.

I hate to shatter your dreams, but there is no “quick”, “easy” way to make lasting wealth from trading.

Trading Success is built exactly the same way success is built everywhere else. Through learning the skills that build success, practising those skills until you become good at it and repeating, reinvesting profits as you go.

It's more sustainable and profitable to engage the services of someone with more skills than you to teach, coach and mentor you to learn how to invest your money yourself if you want to be truly financially independent.

Common Trading Scams to Look Out For...

Signal Sellers

Claim to identify favourable times to buy or sell a currency pair based on professional recommendations that will supposedly make anyone wealthy. In reality, they are only moderately effective, most common way to lose money.

Phishing Scams

Scammers use convincing websites or emails to trick people into giving away their personal information about their trading accounts and then they access your account to steal money. Always check the broker is ASIC registered.

Ponzi / MLM

Elaborate Modern Pyramid Schemes entice investors with the promise of high returns, who promote to their friends. They use some funds from new investors to pay existing ones. When they've made enough profit off the top, they close down leaving investors with nothing.

Robots

Promoted automated systems that supposedly predict upcoming market movements but, in reality, are only randomly effective. You must use their broker and your transactions, whether profitable or not, make money for the scheme through commissions on each of your transactions.

Regardless of the services provided by a coach or mentor, you must accept personal responsibility for your results. No course, coach or mentor will guarantee results, as there are far too many factors that affect performance that are outside our control, including Market Forces and the Activity of the Individual Trader.

For more than 7 years, The Trading Coach has been working to help our LIFT Traders make their goals of financial freedom come true.

As a Trading and Investing business coaching service, we focus purely on helping our individual traders develop the skills needed to build a lifestyle income from their Investing and Trading business.

We provide step-by-step focused coaching, support and education structures to help those people who may not be “naturally talented” investors and traders.

We get to know their style and challenges through our one-on-one personal approach and our model focuses on forming long lasting supportive relationships.

We also believe becoming a LIFT Investor Trader is more like being welcomed into a large and success-focused community.

We understand that when you are just ‘one’, building your investing and trading business alone, someone can only achieve so much.

Which is why in LIFT, we work closely together to help you build a personalised system of support and success specifically for you as you work on achieving your financial and lifestyle goals.

This is the origin of our philosophy: *“We All Succeed Together”*.

Inside this Strategy Guide, you'll find details on the LIFT Investor Trader business model, and; should you become part of LIFT, the support you can expect to receive while building your home-based investing & trading business.

A Day In the Life of an Australian LIFT Investor Trader.

Every LIFT Investor Trader Business is as Unique as every Person we work with.

Individual Goals, time availability and where you are in your journey will determine what you do with your LIFT Trading Business on a daily basis.

Your Business Trading Hours

Trading Hours will depend on your current lifestyle.

If you are working during daytime hours, it is optimal to plan to trade 3 to 4 days per week in 3 to 4-hour sessions per day.

For most Australians, the historically most productive time to trade is during the London morning Session (9.00 am to 12.00 pm GMT). In Eastern Australia, this occurs in the early evening.

This is when (subject to daylight savings) there is generally activity on the London Market, especially when the Market is active and the price is cycling.

If you prefer to trade outside these hours, many people find strong trades on the AUDUSD or USDJPY currency pairs in the Asian / Australian Trading Session.

Alternatively, if you're a night owl, you could trade during the active New York Morning session.

Early morning people can trade the New York Close.

Trading Market Analysis

Using the LIFT Trading Method, you will first analyse the Major Currency Pairs to look for Bullish and Bearish Pressure indications at key Price Levels on each Pair to find upcoming Trade Entry Hot Spots where the reward exceeds the potential risk.

LIFT Traders use an easy-to-follow Top-Down Analysis worksheet that allows you to analyse the market in as little as 45 minutes.

Trade Entry and Management

Now that you've identified the strongest potential Hot Spots in the upcoming Trading Session, you monitor the Market to laser focus your High Probability Trade Entry Point to target a 5 pip to 8 pip profit, never risking any more than an average of less than 3 pips on negative trades.

In a productive market, many experienced LIFT Investor Traders can produce as many as 10 or more profitable trades in a month, with a 70%+ strike rate, achieving up to 20 pip plus net profit consistently each month at higher leverage levels.

Now that you've taken your daily trade, you can

Additional trading funds may fast track your progress.

No. Australia has a heavily regulated finance industry and some actions are just not allowed for Australian-based Trading Educators and Coaches.

Trading in front of someone is considered providing financial advice and is not allowed for Non-AFS Coaches.

Q: Can I get a refund if I change my mind?

Under Australian Consumer Law, businesses are only required to offer refunds or alternatives if they do not provide the services as specified. The LIFT Contract is fulfilled on provision of access to the resources on the first day of membership. Q: Can you Guarantee Trading Results?

It is illegal for Coaches and Educators to provide guarantees or statement of financial claims as the markets can shift and not everyone will achieve the same results, even when following the same processes. Q: Can I trade for other people, using LIFT?

LIFT Investor Trader includes a **Personal** License to invest and trade using our unique methods and strategies for yourself and your immediate family.

We teach proven strategies and use tools and techniques that have historically been proven to generate positive trades. We can review closed trades by clients to identify development opportunities.

Q: Can I do LIFT using my own Trading Method?

The LIFT Trading Method has been developed, refined and improved over more than 16 years of real-world use.

Lessons taught in LIFT Investor Trader reflect structures built into The LIFT Trading Method.

If you accept the risks associated with using your trading method, you can use your own method to trade as a LIFT Investor Trader and apply the business management, trade management, risk management and mindset management techniques within the LIFT Support Program.

LIFT's REAL Benefits to You...

There's so much to learn in trading. What do I need to know to make money?

LIFT Focuses Step by Step on what is **necessary** to build a growing income from trading

All of this Trading Jargon is so hard to understand.

LIFT is an Easy-to-Follow Step by Step process using **plain language** where practical

Trading Courses are too generic – I need to know what will work for ME

LIFT is majority one-on-one coaching based upon Your personal results,

Your challenges and helps You achieve Your Goals based on Your unique Style of Building Success.

In the past, I've been pushed into Trading Too Soon and lost money, or I was stuck in Demo Trading for Too Long, and I never made any money

In LIFT, your progress is determined by YOUR results and moving from Demo Trading to Live Trading and then strategically increasing your investment per trade is based upon Proven Results.

LIFT is focused firstly on the preservation of capital and then looking for high probability trade entries.

Your progress in LIFT should always feel like you're confidently stretching your comfort zone and making real progress naturally and productively. You need to develop the skills and **this takes time**.

I Had No Real Support from Previous Teachers or "Coaches" I used

In LIFT, you have one-on-one Mentor support. If you feel like you're not making progress, you can discuss this in your one-on-one private coaching call with our Lead Trading Coach to look at your specific needs and answer your questions.

I don't learn from just reading a book

LIFT has multiple coaching and education options to suit most people's unique learning style, including on-demand video tutorials, regular live workshops and one-on-one Zoom coaching calls.

We try to provide as many opportunities as possible for coaching and learning to suit most people.

Ultimately, this is your choice. Only join LIFT if you believe it is likely to be suitable for you.

LIFT Funding Options

We appreciate that getting started in LIFT can be a big financial commitment and not everyone is in the position where they can immediately invest \$5K on starting their trading business with the education, systems and support that they need to make Consistent Profit from their Trading. *All business owners understand that they must invest in themselves to succeed.*

How OPM could help Grow Your Business.

In the business world, the most successful investors and entrepreneurs use something called “OPM” (Other People’s Money) to fund the establishment and growth of their businesses.

When used strategically, OPM can give you the opportunity and breathing space to Get into Action with starting your Trading business and gradually repay the amount with terms over a timeframe that suits you, keeping your capital free to fund growth.

A Partnership to Work for You

Recently, we have partnered with leading Finance Broker, Lifestyle Finance Australia to offer LIFT Investor Trader Program applicants access to their 7 finance partners to offer a funding solution that is tailored to suit your needs.

This access to finance to fund your participation in LIFT can free up your current savings to give you a pool of funds that, when you’re ready, you can invest into your Trading Account and, Fast Track your Trading Growth and Income.

With the right terms, you could be paying as little as \$40 to \$65 per week over 5 years, with the option of paying larger amounts and even paying off the amount much quicker from Your Trading Profits and reduce holding costs, without any penalties.

The faster you pay, the lower the total amount payable.

Now, this option isn’t for everyone and you should consider options only that suit your personal needs and circumstances...

Australian residents can apply and may be more suitable for people who are working (part-time, full-time or self-employed), who understand the value of leveraging OPM to help them establish their trading income.

This opportunity through our partners at Lifestyle Finance Australia offers flexible finance terms to new LIFT Investor Traders for their LIFT Investment (either in full or partial) to help you Fast Track your participation in LIFT and to get you on the road to Financial Freedom faster and easier than ever before. You may even qualify for extra to add funds to your trading account...

The process is easy and built into the LIFT application form.

You can find out more information about our Broker Partner at <https://www.lifestylefinanceco.com/>

Review their Terms and Conditions, and seek independent advice regarding costs and fees as part of your decision making process.

We do not receive any commissions or incentives from Lifestyle Finance. Our only benefit is to help people with funding options. **22**
